3. WAP to print

```
***************
******  ********
*****      *******
****        *****
***          ****
**            ***
*              **
*               *
*               *
*               *
*               *
*               *
*               *
***************
```

4. WAP to print

```
*               *
**             **
***           ***
****         ****
*****       *****
******   ******
**************
*************
```

5. WAP to print

```
**************
******
*****
****
***
**
*
**
***
****
*****
******
*******
